Tests of road marking sprayable reactive systems (only cold spray plastic) according EN 13 197

Dear ladies and gentlemen,

the Federal Highway Research Institute plans to conduct type approval of road marking systems made of sprayable reactive systems (**only cold spray plastic**) at its wear simulator. The invitation and further information you'll find on our homepage www.bast.de Verkehrstechnik / Qualitätsbewertung / Prüfungen Straßenausstattung. The first applications of the cold spray plastics will take place in **week 26/2022 (27th -30th June)** at BASTs facility. **All other reactive systems will be tendered and tested later.**

If you want to submit samples for testing, please inform us of your intention **in writing /sending an email to epm@bast.de until 3rd June, 2022** at the latest. Your application should state the number of marking systems and include the following details:

- Marking type (I or II)
- Ratio of components (98/2, 1/1)

Send in your application on a copy of this letter's rear. Additional please send the safety data sheets for the road marking material, you plan to use, so we can accept your application.

Please note that the testing places are given in accordance with the order of application. Subsequent changes to the corresponding sample might cause the sample to be shifted to another test run.

If required, several type approvals can be conducted. To help us meet your requirements, please specify realistic quantities of marking systems.

As soon as allocations are complete, we will inform you about further participation procedures and the number of stations placed at your disposal.

Please note that the attached contract conditions were revised and your announcement can't be accepted without the safety data sheets.

Kind regards,
on behalf
M. Zedler
